Dear Legislator,

As Wisconsin healthcare professionals, we urge you to take action to protect children from exposure to lead in drinking water.

Lead is a powerful neurotoxin that irreversibly harms kids' development, leading to lasting issues like learning disabilities and behavioral problems. Tests have found lead in drinking water across Wisconsin, including in schools and daycares. We must act immediately to get the lead out.

We urge you to address this threat to public health by passing the "Leading on Lead" bill (SB48), and to resist pressure to weaken this important measure.

Sincerely,
